C € Documentation Review

No. 5C200403E.GYN00059

Holder: Guangdong Youte New Materials Co., Ltd.

New Energy Industrial Park, Xinji Village, Machong

Town, Dongquan City

Manufacturer: Guangdong Youte New Materials Co., Ltd

New Energy Industrial Park, Xinji Village, Machona

Town, Dongguan City

Verification of the presence of Technical Review goal:

Documentation compatible with the Medical

Devices Directive 93/42/EEC Annex VII

Disposable Medical Mask (Not Sterile) Product:

Ear Loops Type (175mm*95mm-3) Model(s):

Classification: Class I (no sterile)

(accordingly to the Manufacturer's declaration)

This document has been issued on a voluntary Review output: basis and upon request of the manufacturer. It is

our opinion that the Technical Documentation shared with us by the manufacturer is compatible with the European Standard for Medical Devices.

Technical documentation identified with the no.

20ZCTS0330005SP

The manufacturer is responsible for the CE Marking process, and not exempted to carry out necessary compliance activities. document has been issued on the basis of the regulation on ECM Voluntary Mark for the certification of products. RG01 ECM

TEST REPORT FN 14683

EN 14683 Medical face masks - Requirements and test methods

Medical face masks - Requirements and test methods			
Report Reference No	20ZCTS0330005SP		
Tested by (+ signature)	King Hu Kang Hu		
Approved by (+ signature)	Kevin Yang Kevn.		
Date ofissue	March 30, 2020		
Testing laboratory	Shenzhen ZCT Technology Co.,Ltd		
Address	3/F, Building 5, Hongsheng Industrial Zone, Bao'an Road, Xixiang Street, Bao'an District, Shenzhen, Guangdong, China		
Applicant's name	Guangdong Youte New Materials Co., Ltd.		
Address	New Energy Industrial Park, Xinji Village, Machong Town, Dongguan City		
Manufacturer's name	Guangdong Youte New Materials Co., Ltd. New Energy Industrial Park, Xinji Village, Machong Town, Dongguan City		
Factory's name :: Address ::	Guangdong Youte New Materials Co., Ltd. New Energy Industrial Park, Xinji Village, Machong Town, Dongguan City		
Test specification:			
Standard	⊠ EN 14683:2019		
Test procedure:	Commission test N/A		
Non-stan dard test method			
Test Report Form №.	EN 14683		
TRF Originator	SBD		
Master TRF	Dated 2017-01		
Test item description:	Disposable medical mask		
Trade Mark:			
Model/Type reference	Ear-loops Type(175mm*95mm-3)		
Ratings	Type IIR,		

Test item particulars:					
Test case verdicts:	-				
Test case does not apply to the test object:	N/A				
Test object does meet the requirement	Pass (P)				
Test object does not meet the requirement:	Fail (F)				
Testing:					
Date of receipt of test item	March 19, 2020				
Date(s) of performance oftest	March 20, 2020 to March 30, 2020				
General remarks:					
The test results presented in this report relate only to the item(s) tested.					
This report shall not be reproduced, except in full, without the written approval of the testing laboratory.					
"(see remark #)" refers to a remark appended to	the report.				
"(see Annex #)" refers to an annex appended to	the report.				
"(see appended table)" refers to a table in the Te	est Report.				

Copy of marking plate	
Disposable medical mask	No marking
Model: Ear-loopsType(175mm*95mm-3)	
Guangdong Youte New Materials Co., Ltd.	
New Energy Industrial Park, Xinji Village, Machong Town, Dongguan City	
Made in China.	
Remark on the marking plate:	
The height of graphical symbols is not lessthan 5 mm; The height of letters and numerals are not less than 2 mm	

Throughout this report a comma (point) is used as the decimal separator.

,	EN 14683		
Clause	Requirement - Test	Result - Remark	Verdict
4	Classification		-
	Medical face masks specified in this European	Type IIR,	Р
	Standard are classified into two types (Type I and		11
	Type II) according to bacterial filtration efficiency		8
	whereby Type II is further divided according to		
	whether or not the mask is splash resistant.		
	The 'R' signifies splash resistance.		Р
5	Requirements		-
5.1	General		-
5.1.1	Materials and construction		
	The medical face mask is a medical device,	The company of the co	Р
	generally composed of a filter layer that is placed,		
	bonded or moulded between layers of fabric.		
	The medical face mask shall not disintegrate, split		Р
	or tear during intended use.		
	In the selection of the filter and layer materials,		Р
	attention shall be paid to cleanliness.		
5.1.2	Design	1	-
	The medical face mask shall have a means by		Р
	which it can be fitted closely over the nose, mouth		
	and chin of the wearer and which ensures that the		
	mask fits closely at the sides.		. 10
	Medical face masks may have different shapes		P
	and constructions as well as additional features		
	such as a face shield (to protect the wearer		
	against splashes and droplets) with or without		
	anti-fog function, or a nose bridge (to enhance fit		
	by conforming to the nose contours).		П
5.2	Performance requirements		-
5.2.1	General		-
	All tests shall be carried out on finished products		P
	or samples cut from finished products.		
5.2.2	Bacterial filtration efficiency (BFE)		
	When tested in accordance with Annex B, the BFE	For details, see table 1	P
	of the medical face mask shall conform to the		
	minimum value given for the relevant type in Table		2
	1.		
	For thick and rigid masks such as rigid duckbill or		Р
	cup masks the test method may not be suitable as		
	a proper seal cannot be maintained in the cascade		8

EN 14683			
Clause	Requirement - Test	Result - Remark	Verdict
	impactor.		
	In these cases, another valid equivalent		P
	method shall be used to determine the BFE.		
	When a mask consists of two or more areas with		Р
	different characteristics or different layercomposition,		
	each panel or area shall be		
	tested individually.		
	The lowest performing panel or area shall		Р
	determine the BFE value of the complete mask.		
5.2.3	Breathability		_
	When tested in accordance with Annex C, the		Р
	differential pressure of the medical face mask shall		
	conform to the value given for the relevant		
	type in Table 1.		
	If the use of a respiratory protective device as face ma	sk	Р
	is required in an operating theatre and/or other medica	d	
	settings, it might not fulfil the performance requirement	s	
	with regard to differential pressure as defined in this		
	European		
	Standard.	-	
	In such case, the device should fulfil the requirement a	s	Р
	specified in the relevant Personal		
	Protective Equipment (PPE) standard(s).		
5.2.4	Splash resistance		-
	When tested in accordance with ISO 22609:2004 the		Р
	resistance of the medical face mask to penetration of		
	splashes of liquid shall conform to		
	the minimum value given for Type IIR in Table 1.		
5.2.5	Microbial cleanliness (Bioburden)		
	When tested according to EN ISO 11737-1:2018 the		P,
	bioburden of the medical mask shall be ≤ 30		
	CFU/g tested (see Table 1).		
	NOTE EN ISO 11737-1:2018 specifies requirements		-
	and provides guidance for the enumeration and		
	microbial characterization of the population of viable		
	microorganisms on or in a medical device, component,		
	raw material or		
	package.		
	To determine the mask's bioburden according to		
	EN ISO 11737-1:2018, refer to the procedure as		

	EN 14683		
Clause	Requirement - Test	Result - Remark	Verdict
	described in Annex D.		
	The number of masks that shall be tested is		Р
	minimum 5 of the same batch/lot.		
	Other test conditions as described in EN ISO		Р
	11737-1:2018 may be applied.		
	In the test report, indicate the total bioburden per		Р
	individual mask and based on the mask weight,		
	the total bioburden per gram.		
5.2.6	Biocompatibility		-
	According to the definition and classification in EN		Р
	ISO 10993-1:2009, a medical face mask is a		
	surface device with limited contact		
	The manufacturer shall complete the evaluation of the		Р
	medical face mask according to EN ISO 10993-1:2009		
	and determine the applicable toxicology testing regime.		
	The results of testing should be documented according to the applicable parts of the EN ISO 10993 series.	The control of the control of	Р
	The test results shall be available upon rquest.		P
5.2.7	Summary of performance requirements		(2)
	Type I medical face masks should only be used for patients and other persons to reduce the risk of spread of infections particularly in epidemic or pandemic situations.		P
	Type I masks are not intended for use by healthcare professionals in an operating room or in other medical settings with similar requirements.		Р
6	Marking, labelling and packaging	u u	-
	Annex I, §13, of the Medical Devices Directive		
	(93/42/EEC) or Annex I, §23, of the Medical Device		
	Regulation (EU) 2017/745 specifies the information		P
	that should be specified on the packaging in which		
	the medical face mask is supplied.		
	The following information shall be supplied:		Р
	a) number of this European Standard;	EN 14683:2019	Р
	b) type of mask (as indicated in Table 2).	Type IIR For details, see table 2	Р
	EN ISO15223-1:2016 and EN		Р
	1041:2008+A1:2013 should be considered.		

Table 1 - Performance requirements for medical face masks

Test Item	Requirement	Result	Verdict
Bacterial filtration efficiency (BFE), (%)		1	1
- Type I	≥ 95	1	1
- Type II	≥ 98	1	1
- Type IIR	≥ 98	99,5	P
Differential pressure (Pa/cm2)		1	1
- Type I	< 40	1	1
- Type II	< 40	1	7
- Type IIR	< 60	35	P
Splash resistance pressure (kPa)		
- Type I	Not required	1	
- Type II	Not required	1	
- Type IIR	≥ 16,0	18,7	P
Microbial cleanliness (cfu/g)			
- Type I	≤ 30	1	
- Type II	≤ 30	1	
- Type IIR	≤ 30	25	P

Table 2 Medical Face Mask Material Requirements by Performance Level

Characteristic	Requirement	Test Method	Result	Verdict
Bacterial filtration efficiency,	%	-		
- Level 1 Barrier	>=95	ASTM F2100-19	1	1
- Level 2 Barrier	>=98	ASTM F2100-19	1	1
- Level 3 Barrier	>=98	ASTM F2100-19	99,5	Р
Differential pressure, mm				
H ₂ O/cm ²				
- Level 1 Barrier	<5.0	ASTM F2100-19	1	1
- Level 2 Barrier	<6.0	ASTM F2100-19	1	1
- Level 3 Barrier	<6.0	ASTM F2100-19	5,2	Р
Sub-micron particulate filtration	on efficiency at 0.1 mi			
- Level 1 Barrier	>=95	ASTM F2100-19	1	. 1
- Level 2 Barrier	>=98	ASTM F2100-19	1	1
- Level 3 Barrier	>=98	ASTM F2100-19	99,3	Р
Resistance to penetration b	y synthetic blood, m	inimum pressure in	mm Hg for p	ass result
- Level 1 Barrier	80	ASTM F2100-19	1	1
- Level 2 Barrier	120	ASTM F2100-19	1	1
- Level 3 Barrier	160	ASTM F2100-19	175	Р
Flame spread				
- Level 1 Barrier	Class 1	ASTM F2100-19	1	1
- Level 2 Barrier	Class 1	ASTM F2100-19	1	1
- Level 3 Barrier	Class 1	ASTM F2100-19	Class 1	Р
